<b>DELIVERABLE SUMMARY</b>	
<b>PROJECT INFORMATION</b>	
Project acronym	EuroGeoSource
Project title	EU Information and Policy Support System for sustainable Supply of Europe with Energy and Mineral Resources
Project number	250532
Starting date	01.04.2010
Ending date	31.03.2013
Project web site address	<a href="http://www.eurogeosource.eu">www.eurogeosource.eu</a>
Lead partner organisation	TNO-Geological Survey of the Netherlands
Project manager	Stephan Gruijters
E-mail	<a href="mailto:stephan.gruijters@tno.nl">stephan.gruijters@tno.nl</a>
<b>DELIVERABLE INFORMATION</b>	
Deliverable title	Project web site
Deliverable number	D11.1
WP related to the deliverable	WP 11
Dissemination level	Confidential, consortium only and the Commission Services
Location (if relevant)	n.a.
WP leader	IGR
Participating partners	TNO, GEOZS, MOEW, PGI, EGK, MAFI, RBINS,LNEG, SGSS, UNIZAR, GEODAN
Editor(s)/Author(s)	Anca-Marina Vîjdea, Diana Lorentz
E-mail	<a href="mailto:anca.vijdea@igr.ro">anca.vijdea@igr.ro</a> <a href="mailto:lorentz.diana@igr.ro">lorentz.diana@igr.ro</a>
<b>DELIVERY DEADLINES</b>	
Contractual date of delivery	31-06-2010
Actual date of delivery	The website itself: 31-06-2010 This report: 31-03-2011

The views expressed therein belong only to authors and do not represent the opinion of the European Commission. Neither the European Commission, nor any other person acting on behalf of the Commission is responsible for the use which might be made of the following information.

Annex I Statistics of EuroGeoSource web site

# 1 INTRODUCTION

The EuroGeosource project (EU Information and Policy Support System for sustainable Supply of Europe with Energy and Mineral Resources) is a three-year project, co-financed by the European Commission under the European Research Area, Competitiveness and Innovation Framework Programme (CIP), Theme “CIP-ICT-PSP.2009.6.2. Geographic Information”.

The project has 11 work packages (WPs), the last one, WP11, referring to the activities of awareness, dissemination and exploitation. WP11 started from the first month of the project and will continue on the whole life period of the project.

IGR, as leader of WP11, is responsible for developing the dissemination strategy plan, which must be analyzed and approved by all project partners, as well as for its implementation. This dissemination strategy has been reported to the EU on 11<sup>th</sup> of February 2011 as deliverable 11.2. In this report, the project website that went live in June 2010 was described. This text was copied into this new document to have a stand alone written report for this deliverable 11.1. Although the date of this report is the 31<sup>st</sup> of March 2011, and way beyond the deadline for the project website, we stress that the website itself was indeed available on the first of July, as scheduled in Annex I of the grant agreement.

## 2 PROJECT WEBSITE

The project web site ([www.eurogeosource.eu](http://www.eurogeosource.eu)) will be used for general communication and for internal communication (intranet). Naturally it will have a link to the EuroGeoSource portal. Every consortium member will include a link to the EuroGeoSource website on it's own website to ensure maximum exposure.

### 2.1 General communication

The home page of the EuroGeoSource website is shown in Figure 2:1. At the OMG in Ljubljana (19 July 2010) it was decided that the EuroGeoSource web site will only be in English. The EuroGeoSource portal will be multilingual.

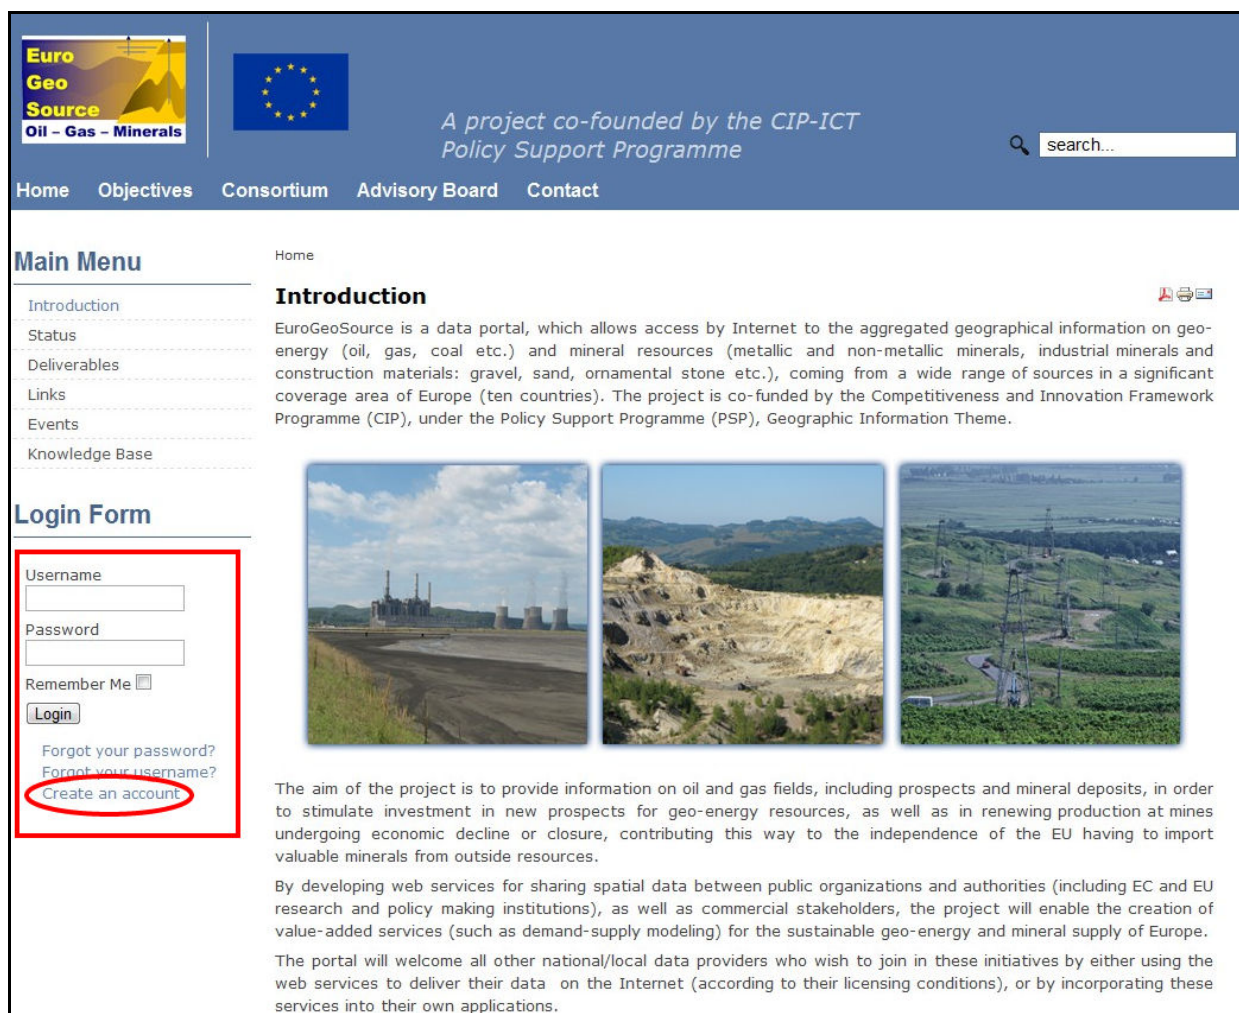

Figure 2:1: Home page of EuroGeoSource website

The statistics of the website are listed in appendix I. They will be updated regularly to give us information on the usage of our website.

The design of the website will ensure a minimum of scrolling by trying to condense the information as much as possible and by using keyword links.

The website has 5 tabs:

- *Home*. This part will display the general introduction to the project
- *Objectives*. This part will explain the objectives of the project as they are explained in the DOW.
- *Consortium*. This part will display all the consortium members, including their logo's, web pages, and contact information. A small text will explain what the main activities of each consortium partner are.
- *advisory board*. This part will display all the members of the advisory board. It will also include a contact link so visitors can pose questions or remarks to the advisory board.
- *Contact*. This part will be used to register visitors. When they register they will be put on the contact list and can choose whether or not they want to receive the newsletters and flyers. They can also express their interest in the project as data user (link to the questionnaire from WP2) or provider (link to the questionnaire from WP3).

The main menu on the home page consists of:

- *Status*. This page will show the planning chart of the project and describe the current status. The status is updated after each OMG meeting.
- *Deliverables*. This page will list all the public deliverables produced by the project as pdf-download.
- *Links*. This part will contain links to relevant other (EU) projects.
- *Events*. This page will list all the events where EuroGeoSource is or will be presented.
- *Knowledge database*. This part will contain a detailed description of the partners, the work packages and the project meetings.

The 'look and feel' of the website should reflect teamwork and good spirit. For this it will have photo's taken from the project meetings, both working and enjoying the beautiful cities of Europe that we visit.

Every partner is allowed to copy the content and translate it in its national language on its institutional web page. Any additional added information that is not present on the general web page of the consortium should be put on a separate page indicating by its copyright the respective institution.

## **2.2 Intranet part**

The intranet part of the website is used to store relevant project documents. The map-structure on the internet is managed by the web master. At this moment there are two maps: "meetings" and "work packages". Within "meetings" every meeting will get its own map, starting with the date. For now there are two maps:

- 190710-200710 WP2 WP3 workshop Ljubljana
- 150410-160410 Kick off Utrecht
- These maps will contain all the relevant documents for the workshop (agenda, venue, presentations, workshop report)
- The map "work packages" contains a map for each WP. Here all the relevant documents for each WP will be stored (draft versions of deliverables etc).

Within the WP1 map, all the OMG minutes will be stored

If a new map is needed, this can be requested by email. For work package leaders and other partners who wish to upload a document, a unique username and password (valid for a rather long period of time) will be provided by the web master, provided this is requested by e-mail.

In order to have access to the intranet section, the consortium partners must be registered. This can be done by using the “Create an account” link in the menu on the left side (Figure 2:1). Another window will open, asking to fill in some mandatory fields (Figure 2:2), then, after clicking the “Register” button, the account is created. An e-mail will be automatically generated, asking to use the activation link provided in the e-mail in order to activate the account. Activated accounts are able to see the intranet section only after an e-mail is written by the respective account holder to the web master, who will modify their access rights. After performing this step the intranet menu becomes visible.
