

General

- Information portal for sustainable use of energy and minerals
- ICT PSP Call, theme 6.2 Geographic information
- budget of 2.5 million EUR
- started April 1, 2010
- ends April 1, 2013

Main data

- Energy (oil and gas) and Minerals (incl. building materials)
- Production and industrial sites
- Geological reserves
- [SPBA atlas: Petroleum geology for Northwest and central Europe](#)

Main objectives

- Develop multilingual web GIS system
- Covering at least 10 European countries
- To identify, access and use (geo-) information on energy and mineral resources
- Interactive (user defined) queries

www.eurogeosource.eu

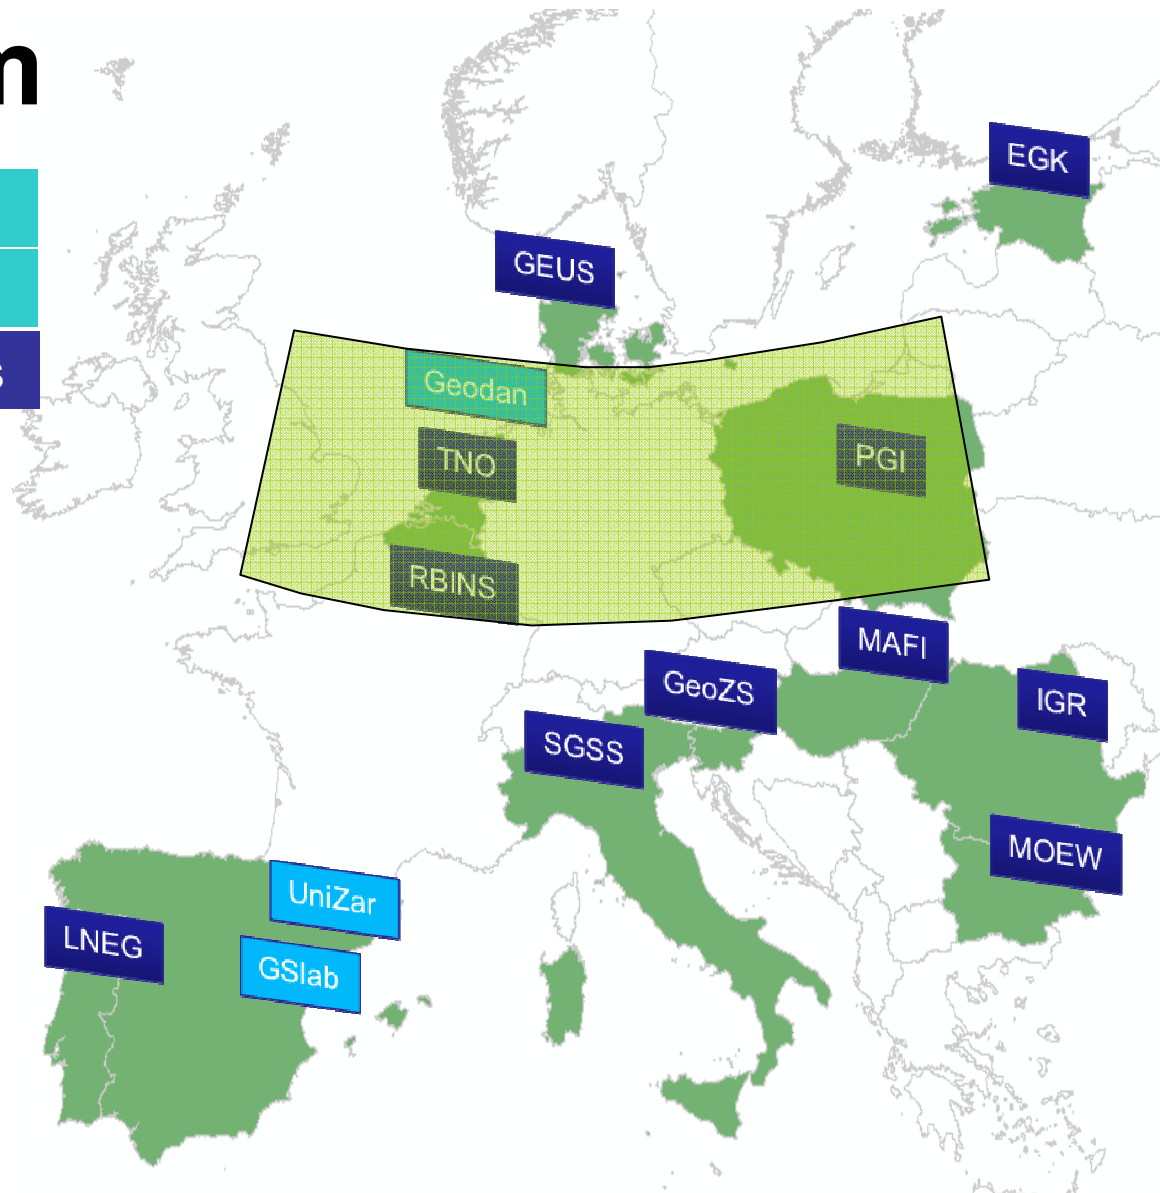

for sustainable and secure supply of
energy and minerals in Europe

Consortium

2 commercial companies

1 University

11 EU Geological Surveys

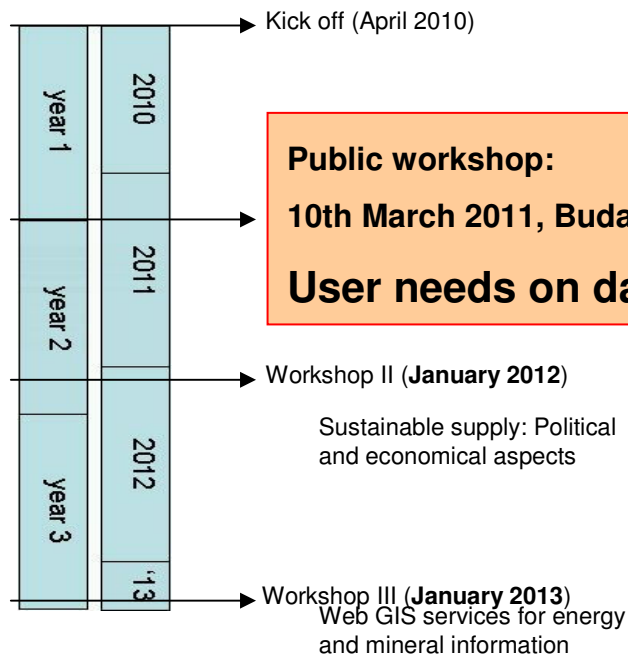

Current status:

- User requirements
- Existing data and management
- Main attributes and exchange format
- Data model and system design
- ...

Public workshop:
10th March 2011, Budapest
User needs on data and services

www.eurogeosource.eu

for sustainable and secure supply
of energy and minerals in Europe

EuroGeoSource and INSPIRE:

- INSPIRE is the ‘core’ of the project:
 - Data / services / exchange format / key attributes
- Registered as SDIC:
 - Participate in review process
 - Pilot project for minerals and energy
 - Submit reference material
- Representatives in thematic working groups
 - Minerals and Geology
 - Energy (proposed): Bring hydrocarbons to GeoSciML and EarthResourceML
